

Aviation Sustainability

The Perfect Convergence for Aviation's New Era

Presented By:
Kim C. Arnold
Carter & Burgess, Inc.

July 20, 2006

Airport Consultants Council

Aviation Sustainability

- Catalyst for Redefining Our Business
 - Changing Business Model for Airlines
 - Transferring “stewardship” of the assets to the Airport
 - Changes in the levels of service
 - Focus on Regional Opportunities
 - Change in Operations
 - Changing Business Model for Airports
 - Greater flexibility to think and act holistically about our business
 - Expiration of exclusive use agreements
 - Opportunity to chart the course for how we integrate total cost of ownership into renewal and new development program
 - Greater opportunity to manage the “big picture” opportunity
 - Rising Energy Costs
 - Aging Infrastructure
 - Enabling Technologies

Aviation Sustainability

- **FAA Considerations**
 - Joint Planning and Development Office (JPDO)
 - Directive to Address Passenger Demand, Airport Capacity, Economic Viability and Social Benefits
 - Integrated Product Teams (IPT) focused upon
 - Environment
 - Safety
 - Operations
 - Conservation
- **ACC Considerations**
 - Situational Awareness to Help Our Airport Partners
 - Recognition that we can work together and do good for the Industry
 - Create teams to implement the Sustainable solution

Aviation Sustainability

- ACI-NA Working Group Mission and Goals
